Yes

This nation is going to be known as a holy nation. Other nations are going to ask, "please send some of your people to us because they carry holiness and it's contagious and it's a fire that burns cities, churches, nations, ministers, prime ministers."

Other nations will call saying, "please send some of your people because they are holy, because they carry holiness, because they administer righteously, because we know that your administrators minister fairness and justice." This city, this nation will be known as holy, set apart as holy. Other nations, ungodly nations, communist nations will say, "please send some of your prime ministers that have been, please send some of your administrators, please send some of your business people because they are holy." Holy and set apart. Holiness, holiness, holiness! Set apart to be holy. An end time movement of holy warriors. An end time movement of holiness.

The youth of this nation will be set apart by their holiness. They won't compromise, they will be fixed, they will be aggressive in their holiness. They will proselyze holiness. They will march the streets for holiness. They will march their university campuses, school campuses for holiness. They will be holy and set apart by their service, by their purity, by their sexual purity, by their motivation. They will not compromise. They will be aggressive. They may be a little offensive even in their stand for holiness until maturity comes but they will be holy and set apart. End time warriors, end time holy warriors.

The enemy has wanted to kill them off by abortion, kill them off by divorce, kill them off with the angry, dark and wicked plan in his heart. The Lord has set apart a movement of warriors and He has rescued them from abortion so that He could make up an end time army and they will travel this nation with a message of holiness. They will travel the world with a message of holiness. An end time army of holy warriors. Don't be afraid of their behaviour. They might be a little offensive until maturity comes in but allow them to move.
